

Atomos Samurai 10-Bit HD/SD-SDI Field Recorder Monitor and Playback & Payout Device

Atomos Samurai with HD/SD-SDI

The revolutionary Samurai is a portable touchscreen Professional 10-Bit HD Recorder, Monitor, & Playback device that captures pristine video and audio direct from any camera with HD/SD-SDI. It encodes in real-time to the visually-lossless Apple ProRes format, onto low-cost, removable 2 1/2 inch hard disks. You can then review your footage in real time onto the pristine 5" display or out onto any HD-SDI capable device, including directors monitors & broadcast equipment. With up to 10 hours battery from the 2 included Lithium Ion camera batteries, you truly have a deck & monitor in the palm of your hand, a super high quality deck & monitor.

Transforms your video production by:

- Bypassing the image-degrading compression needed to squeeze HD onto in-camera flash storage.
- Providing limitless and cheap storage through the use of removable 2 1/2 inch hard disks.
- Including all accessories in one rugged case - Batteries, Chargers, Disk Caddies and a PC/Mac docking station.
- Recording to a high quality editing codec at the camera in the field: simple.
- Recycling older cameras with obsolete tape and compression technology and updating them with a modern, high-quality file-based workflow
