

FM500 Matte Box

The FM500 has been designed for use with the growing range of high quality digital camcorders with small lens front diameters. Manufactured from aviation grade aluminium the FM500 combines precision engineering with simplicity and ease of use for internal focus lenses.

Unique adaptor system

A complete range of machine crafted interchangeable aluminum adaptors are available and designed to fit directly to the end of the lens barrel, enabling easy attachment of the FM500.

- Wide range of adaptor sizes allowing compatibility to most camcorders
- Designed for wide angle applications.
- Removable lens shade

Fully Rotating Filter Stage

There are two fixed filter compartments which accommodate any 1mm thick filter including 4"x4", 4"x5.65" and 4"x6" filters, and one fully rotating stage, which independently rotates 360 degrees offering complete control whether using polarisers or grads.

Additionally the matte box can be easily rotated on the lens adaptor.

Adaptor Guide

The following chart provides a quick reference for selecting an adaptor for a range of popular camcorders. A wider selection of adaptors are available please specify size or camcorder type prior to ordering.

Camera type	43mm	52mm	58mm	72mm	82mm
Sony VX1000/2000		●			
Sony PD150			●		
Sony PD150 (wide angle converter)			●		
Sony TRV900E		●			

Sony DSR200		●			
Canon XM2		●			
Canon XL1 (GL1)				●	
Canon XL1 (GL1) Wide Angle Lens				●	
Panasonic AGEZ35	●				
Panasonic DX110	●
