

AFFORDABLE INDESTRUCTIBILITY: KINETICS CASE KX SERIES EQUIPMENT ATA TRANSPORT CASES

Santa Rosa, CA Cases Plus, Inc. is pleased to announce the newest addition to its product inventory.

The **KX Series** by Kinetics Cases is ideal for transporting photography, industrial, medical, military, aerospace, broadcast, audio/video and other valuable equipment.

With **deeper** internal molds for larger equipment solutions, these new cases will provide maximum protection. These cases have rigid reinforced walls, extendible handle, large wheels, spring loaded steel handles, and military style twist draw latches.

The attractive, durable exterior is black and conveys an image of quality.

These cases can be purchased with or without the wheel and handle kit and offer the following standard features:

- Cases withstand 2000 lb. (900 kg) stacking loads and 7 ft. (2.1m) drops onto concrete
- Thick walls safeguard against jarring, vibration, and crushing
- Silicone O-ring seals out water, salt air, dust, and some gases allowing equipment to be taken into almost any environment
- Non-metal construction will not dent, corrode, or conduct electricity
- Operating temperature -20° to 160° F (-29° to 71° C)
- Ultraviolet and ozone-stabilized
- Molded in color that won't scratch or rub off
- New larger pressure equalization valve allows easy case opening after changes in altitude or temperature
- Cases of similar size interlock in stacks
- Manufactured in the U.S.A. and backed by a limited lifetime warranty
