

Spiderlite TD5

**Strobe, Fluorescent,
Tungsten Halogen...
the Spiderlite TD5 does it all!**

The F.J. Westcott Company, an industry innovation leader in quality products for lighting control, has developed one product that can be used as a strobe to freeze action, with constant Tungsten Halogen lamps to see lighting patterns immediately and with Fluorescents to cool environmental temperatures as well as offer true Daylight Balanced color.

- Ability for use with either **Tungsten Halogen** or **Fluorescent** Lamps.

- Fluorescent Lamps = 27 watts at 5500 Kelvin (E26 Base)

- Halogen Lamps = 150 watts at 3200 Kelvin (E26 Base)

- Ability to quickly change not only color temperature, but environmental temperature as well

- Three separate controls allow you to run multiple combinations of lamps together with no shift in color temperature

- All Metal Construction

- Built-in points for direct attachment of a softbox (Does not fit Octabank or Stripbank)

- Handle attached for quick rotation

- Comes standard with 15' - 120 Volt power cord
